

CHIEF FINANCIAL OFFICER

HAVE RAISED MINIMUM €25 MIO. FOR TECHNOLOGY COMPANY BEFORE

The Job:

We are looking for a CFO who has raised a minimum €25 mio. for technology companies in the past. Copenhagen Atomics is developing thorium molten salt reactors to solve the green energy transition. We plan to raise more than €1 billion during the next 8 years. Part of this will be an IPO on one of the major stock exchanges. Thus you will be part of a very unique journey which very few CFO ever get a chance to experience.

About you:

You are good at keeping appointments and delivering on time. We have a workplace where the pace is high and errors can be expensive. If you like to be challenged in your job, then this is the right place to work for you.

You have probably been a CFO in several tech startups before and maybe you have been part of an IPO process before. You have an extensive network among investors globally. You are technically savvy both in terms of working with computers and software. But you also have an interest in understanding how different technologies work beneath the surface.

You can apply at jobs@copenhagenatomics.com

Send your CV and just write 10 - 20 lines about yourself and about the funding rounds you have raised in the past.

About the company:

Copenhagen Atomics currently has 30 employees and we develop nuclear power plants which will be manufactured on assembly lines in the future. The team predominantly consists of engineers and technicians and we speak both Danish and English.

Copenhagen Atomics develops green energy technology and expects rapid growth during the next 5 years.
