

# HACKER

Man who delights in having an intimate understanding of the internal workings of a system

## **The Job:**

You will take a look at some of the problems which no one else can solve. Both software, hardware and related to social engineering. You will advise management in IT security in current systems and the nuclear reactors which we plan to run.

## **About you:**

You are not good at keeping appointments and delivering on time. You have a good understanding of consequences of your actions or inactions. If you like to be challenged in your job, then this is the right place to work for you.

You have minimum 10 years experience in the field and maybe you have been in trouble before. You are difficult to work with, but you want to make sure that you always have your facts right. Your main programming language is C#.

You can apply at [jobs@copenhagenatomics.com](mailto:jobs@copenhagenatomics.com)

Send your CV and just write 10 - 20 lines about yourself and about stuff you have hacked in the past.

## **About the company:**

Copenhagen Atomics currently has 30 employees and we develop nuclear power plants which will be manufactured on assembly lines in the future. The team predominantly consists of engineers and technicians and we speak both Danish and English.

Copenhagen Atomics develops green energy technology and expects rapid growth during the next 5 years.
