

MECHANICAL ENGINEER

EXPERIENCE IN CAD DRAWING, FEA AND CFD SIMULATIONS

The Job:

We are looking for a mechanical engineer with several years of experience with 3D CAD drawing and ordering of metal components from sub suppliers. You will be part of our reactor design team that designs and simulates components and structures for nuclear reactors. Copenhagen Atomics are developing thorium molten salt reactors to solve the green energy transition.

About you:

You are good at keeping appointments and delivering on time. We have a workplace where the pace is high and errors can be expensive. If you like to be challenged in your job, then this is the right place to work for you.

We hope you have experience with FEA, CFD simulations. Preferably you also have experience in production technologies in the metal industry and their limitations and experience with ordering mechanical parts from suppliers. You enjoy working in close collaboration with engineers and technicians. In Copenhagen Atomics we use OnShape as our CAD system.

You can apply at jobs@copenhagenatomics.com

Send your CV and just write 10 - 20 lines about yourself and about your experience with designing components, pipes, tanks and systems in stainless steel.

About the company:

Copenhagen Atomics currently has 30 employees and we develop nuclear power plants which will be manufactured on assembly lines in the future. The team predominantly consists of engineers and technicians and we speak both Danish and English.

Copenhagen Atomics develops green energy technology and expects rapid growth during the next 5 years.
